

Scenario 3— Shopping Cart

✗ Weak: "Test the cart functionality."

What's missing: No add/remove/update actions,
no price calculation validation, no coupon/discount scenarios, no out-of-stock handling.

Context

Act as a Senior Test Engineer for Shopping Cart functionality in amazon portal in end users perspective

Instruction

[MANDATORY] Generate testcases for Shopping Cart in amazon portal

[MANDATORY] Generate only up to 30 testcases at maximum

[MANDATORY] Include Functional and Non functional

[MANDATORY] Include Positive and negative cases

[MANDATORY] Have more detailed test steps

[STRICT][PRIORITY] Cover the below validations

- 1.)Cover Add action-user should be able to add the product to cart from direct search /from wish list
- 2.) Cover Update action- user should be able to update the size/color/ number of same product in the cart
- 3.)Cover remove action - user should be able to delete the added product from the cart
- 4.)Cover out-of-stock handling - user should be able to view out-of-stock message and the product should be grayed out in the cart enabling user to move the product back to wishlist. It should not be added while price calculation
- 5.)Cover coupon scenarios- only one coupon could be added for a single purchase at a same time.For coupon applied purchase, the amount saved should be visible in the price calculation
- 6.)Cover discount scenarios- For discount products, the discounted price and amount saved should be visible next to the product in shopping cart
- 7.)Cover price calculation- Final Price should be calculated based on discounts/coupon and number of products added along with delivery fee of 50 Rs.
- 8.)Cover multiple product scenario
- 9.)user should be able to navigate back to the product to check details on clicking the product from the shopping cart
- 10.) Cover pay button-pay button should be available at the button of the shopping cart. On clicking the pay button user should navigate the payment page.

11.) Cover concurrent user accessing the portal for performance check.

TCID | Description | Priority | Preconditions| Steps | Expected Result

Persona:

Act as a Test lead to review the testcases

Output"

Ready to downloadable excel file

Tone:

QA Professional Tone with clarity

TCID	Description	Priority	Preconditions	Steps	Expected Result
TC01	Add product to cart from search results	High	User is logged in	1. Search for 'laptop'. 2. Click on a product. 3. Click 'Add to Cart'.	Product is added to cart successfully.
TC02	Add product to cart from Wishlist	High	User has items in wishlist	1. Navigate to Wishlist. 2. Click 'Add to Cart' on a product.	Product moves from Wishlist to Shopping Cart.
TC03	Update product quantity in cart	High	User has item in cart	1. Go to Cart. 2. Change quantity dropdown to 3. 3. Observe cart update.	Cart quantity updates to 3 and subtotal reflects change.
TC04	Update product variant (Size/Color)	High	User has item in cart	1. Go to Cart. 2. Select new variant from dropdown/options.	Cart updates to display the new variant correctly.
TC05	Remove product from cart	High	User has item in cart	1. Go to Cart. 2. Click 'Delete' or 'Remove'.	Product is removed; cart count decreases.
TC06	Out-of-stock handling - Visibility	High	Cart contains item that just went OOS	1. View cart. 2. Check for OOS notification.	Product is grayed out with 'Out of Stock' message.
TC07	Out-of-stock handling - Move to Wishlist	High	Cart contains OOS item	1. View cart. 2. Click 'Move to Wishlist'.	Product is removed from cart and added to Wishlist.
TC08	Out-of-stock handling - Price calculation	High	Cart contains OOS item	1. Check cart total.	OOS item is excluded from subtotal calculation.
TC09	Apply single coupon	High	User has cart with items	1. Go to Cart. 2. Enter coupon code. 3. Apply.	Coupon applied successfully; discount reflects.
TC10	Apply multiple coupons (Negative)	Medium	Coupon already applied	1. Attempt to enter second coupon code.	System displays error: 'Only one coupon allowed'.
TC11	Validate discount display for discounted products	Medium	Cart has discounted item	1. View Cart. 2. Check price near product.	Original price crossed out; discount amount and new price visible.
TC12	Final Price Calculation (Coupon + Delivery)	High	Cart has items	1. Add items totaling 1000. 2. Apply 10% coupon. 3. Add 50 delivery fee.	Final price is (1000 - 100) + 50 = 950.
TC13	Multiple product scenario	High	User has 2+ distinct products	1. Add different products to cart. 2. Check cart total.	All items listed; subtotal sum is accurate.
TC14	Navigate back to product details	Medium	User has item in cart	1. Click on product title/image in Cart.	User redirected to Product Details Page.
TC15	Pay button functionality	High	User has item in cart	1. Click 'Proceed to Checkout'/'Pay' button.	User redirected to Payment/Checkout page.
TC16	Pay button availability for empty cart	Medium	Cart is empty	1. Navigate to empty cart.	Pay button is disabled or not displayed.
TC17	Concurrent user performance (Non-Functional)	High	Network environment set up	1. Simulate 100 concurrent users adding to cart.	System response time remains under 2 seconds.
TC18	Cart persistence after logout/login	Medium	Items in cart	1. Log out. 2. Log in.	Items remain in the cart.
TC19	Apply invalid coupon (Negative)	Low	Cart has items	1. Enter dummy coupon code.	Error message: 'Invalid Coupon' displays.
TC20	Cart performance with large item list (Non-Functional)	Medium	User adds 50+ items	1. Populate cart with 50 items. 2. Load cart.	Page loads without performance degradation.
