

Scenario 4 — Role-Based Access Control

✗ Weak: "Write test cases for user roles."

What's missing: No role types (Admin, Manager, Viewer),
no permission matrix, no unauthorized access scenarios, no app domain.

Context

Act as a Senior Test Engineer for Role-Based Access Control of field "ProductLine" in setup Page of opportunity page in sales force application

Instruction

[MANDATORY] Generate testcases for Role-Based Access Control for different types of user role like BAU Admin, System Admin, Commercial Manager, Read-Only user, Commercial sales

[MANDATORY] Generate only up to 20 testcases at maximum

[MANDATORY] Include Functional and Non functional

[MANDATORY] Include Positive and negative cases

[STRICT] Follow the below permission matrix for only field "ProductLine" in setup Page of opportunity page in sales force application

User Type	View	Edit	Delete
BAU Admin	Yes	Yes	Yes
Commercial Manager	Yes		Yes No
Read only user	Yes	No	No
commercial sales	Yes	Yes	No
System Admin	Yes	Yes	Yes

Example:

TCID | Description | Priority | Preconditions| Steps | Expected Result

Persona:

Act as a Test lead to review the testcases

Output"

Ready to downloadable excel file
